

# 2020 APU DRUG FREE SCHOOLS NOTIFICATION

The Drug Free Schools and Communities Act amendments of 1989 require that as a condition of receiving funds, or any other form of financial assistance under any federal program, the Alaska Pacific University must certify that it has adopted and implemented a program to prevent the unlawful possession, use, or distribution of illicit drugs and alcohol by students and employees.

The Alaska Pacific University presents the following information for your knowledge and in promotion of healthy lifestyles:

## Health Risks Associated With Substance Abuse

*Quoted from page 62 of "What Works: Schools Without Drugs" published by the US Department of Education*

### Alcohol:

Alcohol consumption causes a number of marked changes in behavior. Even low doses significantly impair the judgment and coordination required to drive a car safely, increasing the likelihood that the driver will be involved in an accident. Low to moderate doses of alcohol also increase the incidence of a variety of aggressive acts, including spouse and child abuse.

Moderate to high doses of alcohol cause marked impairments in higher mental functions, severely affecting a person's ability to learn and remember information. Very high doses cause respiratory depression and death. If combined with other depressants of the central nervous system, much lower doses of alcohol will produce the effects just described.

Repeated use of alcohol can lead to dependence. Sudden cessation of alcohol intake is likely to produce withdrawal symptoms, including severe anxiety, tremors, hallucinations, and convulsions. Alcohol withdrawal can be life threatening.

Long term consumption of large quantities of alcohol, particularly when combined with poor nutrition, can also lead to permanent damage to vital organs such as the brain and the liver. Mothers who drink alcohol during pregnancy may give birth to infants with fetal alcohol syndrome. These infants have irreversible physical abnormalities and mental retardation. In addition, research indicates that children of alcoholic parents are at a greater risk than others of becoming alcoholics.

## Drug & Alcohol Counseling & Treatment

### Students:

Alaska Pacific University offers personal counseling services.

### Employees:

Employees experiencing substance abuse-related issues are strongly encouraged to seek counseling services. The Alaska Pacific university employee health insurance program contains benefits for some in-patient and out-patient treatment. Employees should contact the Human Resource Services Office for details.

## Drug and Alcohol Counseling Resources

# Student & Employee Codes of Conduct

## Disciplinary Procedures & Sanctions

### Students

The APU Student Code of Conduct is found on the University website in the Student Handbook. Applicable sections include: Behavior Expectations, Student Conduct Code, Student Conduct System. Students or student organizations are subject to disciplinary action for violations of the Student Conduct Code. There is additional information in the Student Handbook under sections titled: Marijuana and Alcohol. The possession, serving, consumption, or selling of alcohol is prohibited on and off the APU campus including at University sponsored events unless approved in writing by the APU President. Marijuana possession and consumption is prohibited on the APU campus and at University sponsored events including field trips.

Students who violate the alcohol or drug provisions of the Student Conduct Code may receive the following consequences:

**Warning:** A verbal or written warning designed to explain and clarify expected conduct with a stipulation that further similar or related behaviors will result in disciplinary action

**Disciplinary Reprimand:** A written notification from a University official to a student is kept on file in the Dean of Students office. Further violations of the Code of Conduct will result in additional consequences.

**Monetary Sanction:** A fine or requirement for repayment may be imposed. Charges will be placed on the student's account.

**Educational Sanction:** The student may be required to complete an activity or attend a related event in the campus community to become more educated on a particular subject. Examples include enrollment in an anger management course for cases involving violence or an online alcohol education course for cases involving the abuse of alcohol. The cost associated with educational sanctioning will be placed on the student's account.

**Disciplinary Probation:** A student is given the opportunity to demonstrate they can be a responsible and important member of the APU community by agreeing in writing to abide by the Code of Conduct and remain a student with restrictions on activities.

**Suspension from Residence:** Serious infractions or repeated violations of university regulations, rules, and guidelines may lead to revocation of a student's ability to live on campus. The sanction letter specifies the amount of time allowed before a student is required to leave campus. The housing contract/agreement is typically cancelled and payment for room and meal plan is not returned. Residence Hall Council fees are not refundable and housing deposits may be withheld.

**Suspension from the University:** A student suspended from the university is no longer an APU student and may not participate in any university-sponsored event/activity/class or in activities sponsored by university recognized entities such as student organizations and ASAPU. In addition, he/she is denied all other rights and privileges accorded to students in good standing including access to facilities. APU I.D. cards are voided. Grades are determined in accordance with established withdrawal policies. Fee refunds are determined on the same basis as a semester voluntary withdrawal (exceptions noted above). A meeting with the Dean of Students is required before a student can be re-admitted to the University.

**Dismissal:** Serious or repeated violations of the Student Conduct Code or the rules governing alcohol at Alaska Pacific University can lead to dismissal from the university. All tuition paid is forfeited; the student is removed from university housing (if applicable) and prohibited from entering the campus. The ex-student suffers the other losses imposed for suspended students, and is not eligible to apply for admission at any time

### Employees

Disciplinary action at APU is generally progressive unless the conduct merits immediate suspension or termination. That is, the action taken in response to a rule infraction or violation of standards typically follows a pattern increasing in seriousness until the infraction or violation is corrected. The usual sequence of corrective actions includes a written warning, written reprimand, suspension or probation, and finally termination of employment. In deciding which initial corrective action would be appropriate, a supervisor will consider the seriousness of the infraction, the circumstances surrounding the matter, and the staff member's previous record. One or more discipline steps may be bypassed at the University's sole discretion. When possible, supervisors must discuss performance concerns with the Human Resource Coordinator prior to taking any formal corrective action. In the event that disciplinary action leads to termination, Campus Safety and Information Technology must be notified immediately. In all cases where it is administratively feasible, no employee will be dismissed without prior approval by the President or designee.

#### *Applicable Employee Code of Conduct Elements*

1. Unauthorized use of alcohol or being under the influence of alcohol while on University premises or working for the University.
2. Providing alcoholic beverages to any student under twenty-one (21) years of age.
3. Possession, distribution, sale or use, or being under the influence of, illegal drugs while on University premises, participating in University-sponsored activities, representing the University, or performing job duties.
3. Illegal drugs, as referred to in this policy, include drugs that are not legally obtainable, as well as drugs that are legally obtainable but used for illegal or unauthorized purposes.
